

ADAC Partnership Overview

German Patient Volume & Market Share

Over the past two years, German patients have represented a significant and steadily growing segment of our international case volume at Hurghada Medical Center.

Patient Volume

- **2024:** 552 German patients
- **2025:** 575 German patients
- **Total (2024–2025):** 1,127 German patients

Market Share Contribution

- **2024:** German patients represented approximately **23%** of our total patient volume.
- **2025:** The share increased to approximately **27%**, reflecting measurable growth in the German segment.

German Cases 2024 & 2025			
Month	2024 Total	2025 Total	Grand Total
January	8	40	48
February	20	27	47
March	28	34	62
April	34	35	69
May	34	43	77
June	47	47	94
July	49	43	92
August	55	71	126
September	63	58	121
October	101	57	158
November	60	62	122
December	53	58	111
Grand Total	552	575	1127

Key Insight

The consistent increase in both absolute case numbers and proportional share highlights:

- Strong confidence of German insurers and patients in our medical services
- Operational reliability and case-handling efficiency
- A stable and expanding partnership with ADAC

Financial Mix Overview

Cash vs. Insurance – German Market & ADAC

1 German Patients – Overall Financial Distribution

2024

- Total German patients: **552**
- Cash cases: **191 (35%)**
- Insurance cases: **361 (65%)**

2025

- Total German patients: **575**
- Cash cases: **170 (30%)**
- Insurance cases: **405 (70%)**

German Cases Summary 2024 & 2025				
Mangement Method	2024	2025	GT	%
Cash	191	170	361	32%
Insurance	361	405	766	68%
Total	552	575	1127	100%

Insight:
The insurance share increased in 2025, reflecting a stronger insurer-driven case flow within the German segment.

2 ADAC Case Distribution

2024

- Total ADAC cases: **103**
- Cash (Outpatient): **31 (30%)**
- Insurance: **72 (70%)**

2025

- Total ADAC cases: **97**
- Cash (Outpatient): **13 (13%)**
- Insurance: **84 (87%)**

ADAC Cases Summary 2024 & 2025				
Mangement Method	2024	2025	GT	%
Cash(Out Patient)	31	13	44	22%
Insurance	72	84	156	78%
Total	103	97	200	100%

Key Strategic Observation

Compared to the overall German market mix, ADAC demonstrates:

- A **higher insurance ratio**
- A **lower cash dependency**
- A more structured, insurer-based case flow

This confirms ADAC as a **core insurance-driven partner**, not a mixed retail segment contributor.

German Insurance Market Share

Insurance Case Distribution 2024–2025

Across all German insurance cases handled at Hurghada Medical Center during 2024–2025 (Total: **766 insured cases**), ADAC maintained the leading position among all German insurers.

Insured By	Insurance Cases				G.T	%
	2024	2024%	2025	2025%		
ADAC	72	19.94%	84	20.74%	156	20.37%

Grand Total	361		405		766	100.00%

2024 Performance

- Total insured German cases: **361**
- ADAC cases: **72**
- Market share: **19.9%**
- **Rank: #1**

2025 Performance

- Total insured German cases: **405**
- ADAC cases: **84**
- Market share: **20.7%**
- **Rank: #1**

Combined 2024–2025

- Total insured German cases: **766**
- ADAC cases: **156**
- Overall share: **20.37%**
- **Largest single German insurance partner**

Strategic Interpretation

- ADAC consistently holds the **highest insurance market share** within the German segment.
- Market share increased from **19.9% to 20.7%**, confirming sustained growth.
- ADAC represents approximately **1 out of every 5 insured German patients** treated at our center.

This positions ADAC as our **primary German insurance partner** in both volume and consistency.

ADAC Admission Profile

2024–2025 (Total: 156 Inpatient Cases)

All 156 ADAC cases were hospital admissions.

Below is the distribution by admission type and complexity:

Admission Distribution

Category	Count	%
Advanced Surgery	3	1.92%
ICU Admission	24	15.38%
Major Surgery	5	3.21%
Meduim Surgery	1	0.64%
Minor Surgery	3	1.92%
Normal Room admission	116	74.36%
Skilled Surgery	4	2.56%
Grand Total	156	100.00%

- **74.36%** – Normal Room Admissions (116 cases)
- **15.38%** – ICU Admissions (24 cases)

This means that nearly **3 out of 4 ADAC patients** were admitted to regular inpatient rooms, while approximately **1 out of 6 required intensive care management**.

Surgical Interventions (Within Admitted Cases)

- Advanced Surgery – 1.92% (3 cases)
- Major Surgery – 3.21% (5 cases)
- Medium Surgery – 0.64% (1 case)
- Minor Surgery – 1.92% (3 cases)
- Skilled Surgery – 2.56% (4 cases)

→ Total surgical cases: **10.25% of all admissions**

Clear Interpretation for Management

- ADAC portfolio is **100% admission-based**
- **~75% standard inpatient care**
- **~15% ICU-level cases**
- **~10% surgical complexity**

This reflects a medically structured, admission-driven case mix rather than outpatient traffic.

ADAC Diagnosis Profile

2024–2025 (Total: 156 Inpatient Cases)

Below is the medical distribution of ADAC cases treated at our center:

Primary Diagnosis Categories

- **Gastrointestinal / Abdominal:** 39.10% (61 cases)
- **Respiratory / Chest Infections:** 21.79% (34 cases)
- **Trauma & Orthopedics:** 14.74% (23 cases)

These three categories alone account for approximately **75% of all ADAC admissions**.

Diagnosis Category	Count	%
Gastrointestinal / Abdomen	61	39.10%
Respiratory / Chest Infection	34	21.79%
Trauma & Orthopedics	23	14.74%
General Medicine	8	5.13%
General Surgery	7	4.49%
Cardiovascular / Blood Pressure	6	3.85%
Vascular (DVT/Phlebitis)	5	3.21%
Dehydration / Electrolytes / AKI	3	1.92%
Neurology	3	1.92%
Urology / Renal	2	1.28%
Skin & Soft Tissue Infection	2	1.28%
ENT (Ear/Nose/Throat)	1	0.64%
Fever / Sepsis	1	0.64%
Grand Total	156	100.00%

Secondary Medical Categories

- General Medicine – 5.13%
 - General Surgery – 4.49%
 - Cardiovascular / Blood Pressure – 3.85%
 - Vascular (DVT/Phlebitis) – 3.21%
 - Dehydration / Electrolytes – 1.92%
 - Neurology – 1.92%
 - Urology / Renal – 1.28%
 - Skin & Soft Tissue Infection – 1.28%
 - ENT – 0.64%
 - Fever / Sepsis – 0.64%
-

Executive Interpretation

- The ADAC case mix is primarily driven by **acute abdominal, respiratory, and trauma-related conditions**.
 - A meaningful portion involves **infection-driven and emergency medical presentations**.
 - The portfolio reflects **acute care and emergency-driven admissions**, not elective or low-complexity cases.
-

ADAC Length of Stay Analysis

2024–2025 (Total: 156 Admissions)

The following represents the distribution of hospital stay duration for all ADAC inpatient cases:

Short-Stay Admissions

- **1 day stay:** 77 cases

- **2 days stay:** 53 cases

Together, **130 cases (83%)** were discharged within 1–2 days.

Admission Days	Count	%
1	77	49.36%
2	53	33.97%
3	8	5.13%
4	2	1.28%
5	5	3.21%
6	1	0.64%
7	3	1.92%
9	3	1.92%
11	1	0.64%
12	1	0.64%
13	1	0.64%
15	1	0.64%
Grand Total	156	100.00%

Medium Stay

- 3 days: 8 cases
- 4 days: 2 cases
- 5 days: 5 cases
- 6–7 days: 4 cases

These represent structured medical admissions requiring monitored inpatient care.

Extended Stay (Complex Cases)

- 9 days: 3 cases
- 11–15 days: 4 cases

Only **~4–5%** of cases required prolonged hospitalization.

Executive Summary

- The majority of ADAC admissions are **short, acute-care hospitalizations**.

- More than **80% discharged within 48 hours**, indicating:
 - Efficient clinical management
 - Rapid stabilization & treatment
 - Controlled inpatient resource utilization

This reflects a **well-balanced portfolio combining acute management with operational efficiency**.

ADAC Patient Age Distribution

2024–2025 (Total: 156 Inpatient Cases)

The age distribution of ADAC patients demonstrates a predominantly senior portfolio:

Age Breakdown

- **61+ (Seniors):** 97 cases – **62.2%**
- **41–60 (Middle Age):** 32 cases – **20.5%**
- **18–40 (Young Adults):** 18 cases – **11.5%**
- Under 18 (Infants, Children, Adolescents combined): 9 cases – **5.8%**

Age Group	Category	Count	%
0 – 4	Infants	3	1.90%
5 – 12	Children	4	2.60%
13 – 17	Adolescents	2	1.30%
18 – 40	Young Adults	18	11.50%
41 – 60	Middle Age	32	20.50%
61+	Seniors	97	62.20%
TOTAL		156	100%

Key Strategic Insights

- Nearly **2 out of every 3 ADAC patients** were aged 61 or older.
- More than **82% of cases** involved patients above 40 years.
- This reflects a **higher medical risk profile**, consistent with:
 - Acute abdominal and respiratory conditions
 - Cardiovascular presentations
 - ICU-level admissions

Executive Interpretation

The ADAC case portfolio at our center is clearly **senior-dominant and medically risk-oriented**, requiring structured inpatient management and higher clinical vigilance.

Executive Summary – Key Messages

After reviewing the full 2024–2025 data, three key conclusions clearly define our partnership:

1 ADAC is our largest German insurance partner

ADAC consistently holds the highest market share among all German insurers and represents more than 20% of insured German cases at our center.

2 The ADAC portfolio reflects medical complexity

The case mix is:

- 62% senior patients (61+)
- 15% ICU admissions
- 10% surgical interventions

This confirms a structured, higher-risk medical portfolio

3 Operational efficiency is strong and controlled

- 83% of patients discharged within 48 hours
 - Efficient stabilization and inpatient utilization
 - Controlled length of stay with capacity for complex cases
-

Closing Statement

We value ADAC not only as a high-volume contributor, but as a strategic medical partner. Our data reflects stability, complexity management, and operational efficiency — forming a strong foundation for continued growth and collaboration.
